**Project:** Third Eye for The Blind

**Steps:**

1. Construct one module (wiring/soldering) by following circuit diagram (Ultrasonic sensor)
2. Make the code in arduino for the module
3. Test the module
4. Once the module is successfully tested, attach it to palm of glove
5. Test the glove with the attached module

**Major Milestone:**

- Having a working prototype of The Third Eye for the Blind!
